ABOUT THE THEME

The 21st century classroom is created on the promise that students experience what is required while entering their work place in the global environment. The requirements of their classrooms therefore set it apart from 20th century classrooms. World, that is changing exponentially and the students are already familiar with too many facts. We cannot afford to just pour facts, as they are the part of multimedia world since childhood.

They just don't listen rather they participate.

They just don't sit and watch but they get involved.

Thus they are getting tremendous information and information only may ruin the world but on the other hand in an appropriate frame it would be a blessing. Here comes the knocking role of education to guide them in right direction.

"Our job is not to prepare students for something. Our job is to help students to prepare themselves for anything". ---A.J.Juliani

If we delve from perspective of education in these more than seven decades after independence and take looking glass view of the past, present and future through it, we may realize that we need to think in terms of quality education. Sometimes even the best of the curriculum and the most perfect syllabus don't yield good result unless they are related to the life. Most considerable is to create conducive environment for learning following the right method of teaching and with support of genuine and intelligent teachers. This type of education would focus to increase individual's cop-ability for better tomorrow.

"Educating the mind without educating the heart is no education at all". ----Aristotle

Realizing the genuine need to have relevant talk and to reflect something productive, we are organizing the seminar on this topic.

OBJECTIVES OF THE SEMINAR

1. To promote deeper understanding about attitude, interest and develop desirable interpersonal relation.
2. To understand leadership attributes and challenges.
3. To help student-teachers to critically understand how their observations relate to the theories they have learnt and also to situate their learning in realistic frames.
4. To build an interdisciplinary framework to interpret and analyze observations and interactions.

MAIN THEME - "TEACHING MATTERS THE MOST: CREATING AN ENVIRONMENT THAT FACILITATES LEARNING"

SUB THEMES

- LEADERSHIP: Exhibiting Professional Competence Using Positional Authority To Promote Good Teaching
- LEARNING: Encouraging In Depth Understanding With Real World Application
- VALUE SYSTEMS: Need Of Hour Is The Value Education Not In Thought But In Action
- SKILL, ASSESSMENT AND EMPLOYABILITY

*Any other topic, related to the theme

PUBLICATION

Selected papers will be published in the proceedings of the seminar in the form of book with ISBN number. The contributors (only those who register themselves and attend the seminar) will be given a certificate of presentation on the day of the seminar itself.
